N. Public Comment on Matters Not on the Agenda

Comment:

December 15, 2020 Hello there California Board State Board of Equalization Staff, I was wondering when the December 16, 2020 public comment form is going to be open so I can submit my public comment I tried to submit in November but I guess couldnt for some reason. Here is my updated public comment I tried to submit going to submit again: December 16, 2020 Why is the Property Tax auction five year auction moved from October 2020 into February 20, 2021 in Los Angeles County <https://ttc.lacounty.gov/schedule-of-upcoming-auctions/> should be October 2021 or no set date this is Covid 19 times people when we in a Covid 19 situation others postponement until October <https://www.ttc.ocgov.com/proptax/pta> and <https://www.countytreasurer.org/TaxCollector/TaxSaleInformation.aspx>. Property tax owners trying to make ends meet and you the government thinks its okay to have this, we in like Great Depression you guys have no feelings at all. Yeah, we knew five years but fifth year postpone you care about the people not yourselves Treasurer and Tax Collector you people think all is okay assessors ect please look into this and consider hard times of Covid to extend and let know board and Governor Newsom ect. Why does the all children of the grandparents have to be deceased to get Grandparent to Grandchild exclusion the children, never there Grandparents were and you must think this is fair should be amended and have the California voters vote on it not really helping Then in other hand, higher taxes on a home you see was raised in passed down family to family was \$800 70s rate now close to \$4000 a year not right at all. Instead of have tax sales help income qualify people if qualify for exclusions or not especially now Covid hard times like I mention like the Great Depression we must help the people house them, you get funds help people who need it most affordable payment plans five year, friendly service with treasurer and tax collector payment matters, assessor people trained staff for exclusions. These three things above I would like for it to be addressed if you cared so much for the people and not the government where money comes and goes more of the people you must listen to their concerns.. Thanks! -Pat Los Angeles County Property Taxes Payer
