M2a2. Guidance and Rulemaking

N. Public Comment on Matters Not on the Agenda

Comment:

I am concerned about my children who have worked on the family farm their entire life. They made a choose to stay in the agriculture busy, producing food for our county and the world. Their future is to continue to product food. When I pass , the taxes will raise so much they can not afford to keep the land, their lives will change. The different types of food production generates a wide range of net income. Is the type of production , that equal the calculation of value ,going to be taken into consideration, enough to make it fair? I could own ground that is suitable to produce a higher paying crop, but we choose to produce the crops we have for generation. Thank you
