

Proposed comments on Solar Energy Systems New Construction Exclusion

Hi Barry, I received a copy of your notice to interested parties for the Active Solar Reporting Requirements. Would this apply to existing solar projects? We have a solar RV/Boat storage facility in Oakley (built ~5 years ago, aerial attached) and in total we produce about 4MW of solar power that Marin Clean Energy buys under a 20 year PPA. The Depr. of Energy weighed in on our allowable costs for solar and this was given to the Assessor's office to determine what should/shouldn't get assessed. Is this form now saying I have to annually report the costs/value of the solar system onsite? I doubt anything will change...

We are planning to build a few more of these solar RV/Boat projects in California - should we plan to have to fill this out annually on the new projects as well? Thanks.
